

CONNECTOR, Chev/GM Vehicle Specific

INSTALLATION INSTRUCTIONS

⚠ WARNING: The attachment and installation of this product is beyond the control of Winston Products, LLC. Winston Products, LLC is not responsible for the attachment or the installation of this product. Winston Products, LLC is not liable for damages and/or injuries that are the result of improper use/attachment or are the result of use beyond the intended towing application. The liability of this product is limited to the purchase price if it proves to be defective in material and/or workmanship. Any and all warranties, explicit or implied, are void if the product is damaged or worn.

1. Locate the vehicle tow package harness directly behind the rear bumper or inside the driver's side frame channel.
This harness should have the same connector ends as the TowSmart vehicle specific harness.
2. Disconnect the vehicle tow package harness, being careful not to break the locking tabs.
3. Apply a small amount of dielectric grease to all electrical connectors to help prevent corrosion.
4. Plug the TowSmart vehicle specific harness into the male and female disconnected harness.
Ensure the connectors are fully inserted with the locking tabs firmly in place.
5. Locate a grounding area on the vehicle frame and remove any dirt or rust.
Ground the white wire to the frame with a self-tapping screw.
6. Attach the completed tow harness into the trailer connector.
7. Check the lighting system for proper operation with the engine running.
